STATEMENT OF EVERGLADES PIPE LINE COMPANY L.P. CONCERNING JET FUEL PIPELINE SUPPLYING MIAMI INTERNATIONAL AIRPORT

A news article posted in the online version of the Miami Herald (www.miamiherald.com [River Cities Gazette section](#)) on February 5, 2013 stated: "*A proposed pipeline underneath Miami Springs would serve as the sole source of jet fuel to Miami International Airport*".

Everglades Pipe Line Company, L.P., an operating subsidiary of Buckeye Partners, L.P., wishes to clarify that the Everglades Pipe Line Company L.P. is conducting a feasibility assessment of potential options to improve service delivery to the Miami International Airport by way of relocating a small section of the existing pipeline and no decision has been made to alter the current pipeline or construct any new pipelines at this location. Should Everglades Pipe Line Company L.P. reach the conclusion that a pipeline relocation would be desirable, Everglades will work with the appropriate governmental officials and regulatory agencies to understand the best path forward.

As part of continuous improvement efforts, Buckeye's affiliates frequently identify and evaluate options to improve the safe, reliable and low cost delivery of energy transportation services to our customers. The Everglades pipeline study is one example among many of Buckeye's efforts to examine opportunities for continuous improvement in the delivery of energy services.

Buckeye Partners, L.P. (NYSE: BPL) is a publicly traded master limited partnership that owns and operates one of the largest independent liquid petroleum products pipeline systems in the United States in terms of volumes delivered, with approximately 6,000 miles of pipeline. Buckeye also owns approximately 100 liquid petroleum products terminals with aggregate storage capacity of over 70 million barrels. In addition, Buckeye operates and/or maintains third-party pipelines under agreements with major oil and gas and chemical companies, owns a high-performance natural gas storage facility in Northern California, and markets liquid petroleum products in certain regions served by its pipeline and terminal operations. Buckeye's flagship marine terminal in The Bahamas, BORCO, is one of the largest crude oil and petroleum products storage facilities in the world, serving the international markets as a premier global logistics hub. More information concerning Buckeye can be found at www.buckeye.com.
